Chairman Hippler called the meeting to order at 10:58am.

Board members reviewed and discussed with Weare Historical society members and members of the public the state of the Gordon Brown barn and potential remedies to the water in the basement situation. In the end, it was agreed that the current flooding was more than likely caused by the frozen ground, snow pile from the roof, and rain from this winter that allowed the water nowhere to go but in the basement. Possible solutions will be discussed at a further time, when conditions are better. The board didn't deem anything damaged at this time that the WHS has stored at the barn from what was seen.

Being there was no further business to come before the Board, Chairman Hippler moved to adjourn at 11:27am, Vice Chairman Meaney seconded; passed 4-0-0.
