October 15, 2014

## **NOTICE TO RESIDENTS**

The Department of Public Works is requesting citizens to serve on the New Public Works Garage Advisory Committee. Interested citizens are encouraged to participate in the review of present plans, possible plan revisions and idea sharing with the goal of constructing a new DPW Highway Garage at 224 Merrill Road, the site of the present facility. The Committee will be limited to 12 members, so please submit a brief statement of your relevant experience related to what contributions that you might be able to provide to the committee. Additionally, all members would be urged to support a new DPW Facility publicly at the Town Deliberative Session. A series of open house events are planned at the present DPW Garage over the course of the winter to inform the public of the DPW requested new facility and to view the present conditions at the DPW. Again, committee support would be appreciated at the open house events. After a committee is assembled, a series of meetings will be scheduled to consider a new DPW facility.

Respectfully submitted,

*Tim Redmond*  
Public Works Director
