

Think about how different your day-to-day life would be if you weren't able to drive yourself or find a ride. How would you get your food? How would you go to your medical appointments? How

would you get out of the house? This is a reality many people in New Hampshire face every day, including residents of Weare.

This survey was created to give Weare residents the opportunity to share their experiences regarding transportation access. The hope is that the results of this survey will highlight the transportation needs of Weare residents, and lead to solutions that address those needs.
