# What is Supplemental ALI?

The New Hampshire Enhanced 9-1-1 system is without question one of the finest in the nation. New Hampshire is fortunate to have several 'enhancements' within the 9-1-1 system that other 9-1-1 centers around the country can only dream about. For instance, 9-1-1 Emergency Medical Dispatchers (EMDs) have instant access to TTY communication for the deaf as well as Text-to-911. They can immediately communicate with a deaf or hard of hearing caller in need of help. In addition, New Hampshire 9-1-1 subscribes to the AT&T Language Line service which gives 9-1-1 EMDs quick access to over 170 languages and dialects.

Most people know that when you dial 9-1-1 from your home phone, the enhanced computer screen is filled in with the caller's name, address and telephone number. Most people don't know, however, that your telephone number is technically known as ANI (Automatic Number Identification) and the location of the phone (aka your address) is known as ALI (Automatic Location Identification). ANI gives us ALI. New Hampshire 9-1-1 has the unique ability to add supplemental or additional information about permanent medical conditions or hazardous materials specific to YOUR location or address.

Perhaps the most overlooked 'enhancement' of New Hampshire's 9-1-1

system is the Supplemental ALI database. 9-1-1 maintains this database which is separate from the 9-1-1 database. This special database is reserved

*Supplemental ALI computer screen*

for permanent medical conditions and hazardous materials on site. It is driven by the customer's phone number(s). If a customer wanted to add information to the database, they would fill out the Supplemental ALI form. The form asks for the customer's name, address, telephone number(s) and either the permanent medical condition (described in a few brief words) or the hazardous material information associated with the customer's address. Once the form goes through the appropriate processing steps, the information is entered into the database. From that point forward, if a 9-1-1 call were to be placed from that customer's telephone, this supplemental information will pop-up on the 9-1-1

EMDs screen and they will pass this important information along to the local responders.

In March of 1996, the Supplemental ALI database was put to the test when a 9-1-1 call was received from a Nashua woman. When the call came into the 9-1-1 EMD, the only thing heard was a barking dog. Thankfully, the woman had submitted a Supplemental ALI form indicating she had a sleep disorder and there was a medical dog trained to dial 9-1-1 in her home. The 9-1-1 EMD relayed the information to the local dispatch agency and help was on the way. As it turned out, the woman had stopped breathing and an alarm was sounding on her breathing machine.

If the alarm sounded, the dog was trained to knock the kitchen wall phone off the hook with his nose and then rake his paw over the speed dial pad which had been programmed to dial 9-1-1. Not a single word was spoken and the woman received the help she needed.

If you or one of your family members has a permanent medical condition you'd like to enter into the Supplemental ALI database or if you have hazardous materials you'd like to enter into the Supplemental ALI data-base, please contact the 9-1-1 business office at (800)806-1242 or (603)271-6911 and ask for a Supplemental ALI form. You can also access an electronic version of the form online at: [www.nh.gov/nh911](http://www.nh.gov/nh911).
